

MOUNTAINS AND HIMALAYAS

Mount Everest is the tallest mountain on Earth at 8848 meters above sea level.

It is located in the Himalayas on the border between Nepal and Tibet.

Sir Edmund Hillary and Tenzing Norgay were the first to summit Everest in 1953.

The Himalayas stretch across five countries: India, Nepal, Bhutan, China, and Pakistan.

K2 is the second highest mountain at 8611 meters and is considered more dangerous than Everest.

The Andes is the longest mountain range in the world, spanning 7000 kilometers.

It runs through seven countries in South America including Chile, Argentina, and Peru.

Mount Kilimanjaro in Tanzania is the highest mountain in Africa at 5895 meters.

It is a dormant volcano with three cones: Kibo, Mawenzi, and Shira.

The Seven Summits challenge involves climbing the highest mountain on each continent.
